

Vestibular Rehab

Vestibular Rehabilitation Therapy (VRT) In Surrey | BC

Do you know anyone who has ever felt dizziness, vertigo, or issues with their posture and vision? Then, it might be trouble with their vestibular system.

The vestibular system is the complex sensory system that is responsible for maintaining balance and coordination of movements. This system is located in the inner ear. The vestibular system works with the visual and proprioceptive systems to provide equilibrium and awareness.

Maintain Equilibrium With VR Therapy

To maintain balance and reduce vertigo symptoms, it is essential to understand the root cause that triggers vertigo. Many causes can affect the vertigo system like inner ear disorders, migraines, medication, and neurological disorders. A thorough assessment will be conducted by our **physiotherapist** to provide the patient with a customized exercise program. Some balance exercises will also be incorporated to improve stability and postural control.

Recover With Vestibular Rehabilitation Therapy In Surrey, BC

With the help of our experienced therapist, many patients recover from disorders of the vestibular system. Although there are many kinds of vestibular disorders, most patients face issues like Benign positional vertigo, Labyrinthine infarction, Migraine, Concussion, Neurotoxicity, Otosclerosis, Dizziness, and Blurry vision. Our physiotherapists will treat such problems through customized exercise programs, gaze stabilization exercises, habituation exercises, balance training, coordination exercises, **concussion management** and many more, based on the patient's assessment report. If you or anyone you know is facing such issues, get treatment now to avoid further serious damage. Reach out to the highly experienced and professional physiotherapy clinic in Surrey, BC. Get the right guidance to treat such vestibular disorders.
